CABINETS & COUNTER TOPS

SALES | ULYSES FUENTES | ulyses@shower-walls.net | T. 855 219 3751 X.112

In 2018, Modul Woods launched as our premium vanity cabinet installation. Our vanity cabinets work for a wide range of customers within the residential, hospitality, and multi-family channels. Our business synergy with countertops, cabinets and now adding kitchenettes to provide an integral service that allows us to adapt to the needs of each client.

MATERIAL SPECIFICATION

Melamine

Melamine is a plastic material composed of resins that covers chipboard/MDF, it's a hard and resistant synthetic material ideal for manufacturing furniture for kitchen and

Laminated
MDF

The laminate is a coating made up of layers of paper impregnated with thermosetting resins (they harden after processing) applied to the MDF board, subjected to pressure for

Painted
MDF

MDF Painting are those boards that are subjected to the painting process, providing a high variety

Regular
Close

Regular-hinges or normal-close hinges are the kinds of hinges that have a spring-based system built into them. In regular hinges, at

Soft Close

Soft-close hinges are backed with a hydraulic mechanism so that whenever a door is closed with force, the mechanism takes over

Height

Although the cabinets can be easily adapted, the standard measurement we use is 34.5" from the floor to the top of the cabinet.

QUARTZ COUNTER TOPS

Quartz Kitchen Counter Tops have certain qualities that make them special, even among other stone countertops like granite. You can find quartz kitchen countertops in many colors—from bright whites to cool grays, warm creams, and rich browns and blacks. Some quartz has veining that makes it look like marble. And some options contain mirror chips that reflect light and appear to make the countertops sparkle.

Quartz Has Excellent Durability

The good news is it's possible to buff out light scratches with polish and get your countertops looking like new again. It's also possible to fix deep scratches using an epoxy filler. However, the key is scratch prevention by doing things like always using cutting boards.
